

## Animal Helpers© Version Order Form

Players race around the board catching diseases and trying to be cured. Catch diseases left in public places, pass diseases to other players, get cured in the medical stations. Medicaid, Christmas bonuses, and the lottery help pay the bills. Diagnose your disease in the Info center, get it wrong and you catch the disease! **DISEASES** cards tell the players about the degrees of seriousness ranging from the most basic to a major communicable disease, the Latin name, causes, symptoms and various treatments. **CURES** cards discuss the various treatment options available; visiting a specialist, a clinic, drugstore, or a voodoo doctor. The **ANIMAL HELPER** cards represent some of the areas in medicine where animals have contributed to furthering our understanding of a disease.

Research involving animals has led to treatments for cancer, heart disease, diabetes, and many other illnesses; however, most children do not have first-hand experience with research, treatment, and cures. **Infection™ – Animal Helpers© Version** teaches children and adults the facts about the crucial role animals play in fighting the war against disease. This classroom activity is great for rainy days or substitute teachers.

The game requires two to eight players, ages nine to ninety. The retail price for the game is \$38, or two for \$65. Shipping is included! Game is free to Title I schools on first come, first served basis. Limit 1.

A “Playbook” to support the use of the Infection game as a classroom instructional activity is available.
